Author, Title, and Source

(a) Translations completed and distributed

- |     |                                                                                                                                                              |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 500 | BURO, A. The action of heat on the fungus resistance of pine and beech. Holz als Roh- und Werkstoff, Bd. 12 (1954), 294-304.                                 |
| 519 | KOLLMANN, F. Method of physical wood research. Schweizerischen Zeitschrift fur Forstwesen, No. 1, January 1962.                                              |
| 521 | KOVANEN, M. On the rotary cutting of veneer. Papperi Ja Puu Papper Och Tra, No. 9, 1962.                                                                     |
| 533 | LIIRI, O., and HAAVISTO, S. Investigations on the significance of prepressing in the manufacture of particle board. Papperi Ja Puu Papper Och Tra, 1962 (4). |
| 541 | SALLENAVE, P. Physical and mechanical properties of the tropical woods of the French Union. Centre Technique Forestier Tropical, Publication No. 8, 1955.    |
| 548 | BARSKAJA, E. I. Histochemical study of the process of lignification in the maturation of wood. Fiziologija rastinnii, USSR, Vol. 9, No. 2, pp. 210-221.      |

(b) Translations being reproduced

- |     |                                                                                                                                                                         |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 511 | PAHLITZSCH, G., and MEHRDORF, J. Effect of chip thickness and wood moisture content on the manufacture of chips. Holz als Roh- und Werkstoff, August 1962, pp. 314-322. |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

(b) Translations being reproduced--con.

- 531 ZDENEK, M. Present status of protecting timber against fire. Drevo, 1962 (6).
- 532 CIZEK. Effect of press technique of increasing production. Drevo, 17 (5), 1962.
- 535 LYR, H. Wood decomposition by fungi. Der Archiv fur Forstwesen 10 (4-6), 1961.
- 536 DOMANSKY, R., and RENDOS, F. On the pyrolysis of wood and its components. Holz als Roh- und Werkstoff, 1962 (12).
- 545 RACKE, H. H. Stress distribution in the zones of the steel load transmission in prestressed pretensioned concrete beams of different eccentricities. Schweizer Archive-Annales Suisses, Vol. 22, No. 6, pp. 169-177, June 1956.
- 547 LOON, VAN J. The relationship between paint and wood. Sonderdruck aus Deutsche Farben-Zeitschrift, Jahrgang 17, pp. 61-66, February 1963.
- 549 KISSER, J. and LOHWAG, K. Histochemische Untersuchungen an Verholzten Zellwanden. Mikrochemie 23:51-60 (1937).

(c) Translations scheduled

- 553 GAUDEL, PAUL. The polyglycol process, a contribution to the conservations of big pieces of moist wood. Presented at the fourth meeting of the Arbeits-Gemeinschaft des Technischen Museumspersonals in Mainz, 1962.
